What a SAFe® Product Owner/Product Manager Certification Demonstrates

SAFe certification demonstrates your proven knowledge of Lean-Agile methodologies and role-specific skills in critical competencies. When this demonstrated knowledge is tested through our Subject Matter Expert (SME)-developed exam, candidates will:

- **Lead the planning and execution of work during a PI**
- **Decompose Epics to Features to Stories for the team**
- **Understand how to put the customer at the center of product development**
- **Achieve skills to collaborate with Agile teams to forecast work**

What SAFe® Product Owner/Product Manager Certification Includes

Maintaining an active SAFe Product Owner/Product Manager certification offers the following benefits:

Career Development & Community

- Exclusive webinars on emerging SAFe® topics

- Access to the SAFe community forums for career advancement, learning and mentorship opportunities, job boards, and more

- Participation in role-based events for additional networking, learning, and development
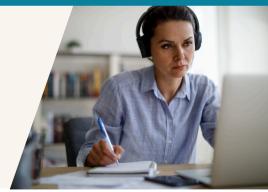

Continued Learning

- Framework upgrade learning series for all certified professionals

- On-demand access to all keynotes, breakout sessions, and other content from SAFe Summits

- Continued learning with 8 role-specific training videos

Toolkits and Applications

- SAFe Collaborate for virtual facilitation

- Online collaboration templates for all SAFe team events

- 7 Facilitator Guides designed to help Product Owners and Product Managers with key SAFe events

- Toolkits to help prepare and execute PI Planning

Building agile relationships and driving towards shared outcomes while implementing new ways of working to improve the delivery process is very fulfilling and a welcome challenge."
